CENTRE

Company Profile

Heating and cooling solutions for your home or business

Who we are

Parr's Heat Pump & Refrigeration Centre is southern Tasmania's leading heating and cooling specialist. With over 45 proud years in the operation, our dedication to customer service and quality products means we have established ourselves as the trusted name in the industry.

We are proud to offer the highest standards of workmanship and servicing. Our own fully qualified and trained technicians maintain the heat pumps and ducted systems that we install.

We sell quality products at competitive prices, ensuring that you get the best value for money, whilst delivering the best residential and commercial air conditioning solutions available.

Our Promise

Quality products

Expert advice

Reliable support

Why choose Parr's

1

The Heat Pump Specialists

Whilst Parr's offer a wide range of great products and services, we are still the specialists in heat pumps. Our advice, products, installation and support for your new system are second to none.

2

Expert Advice and Detailed Quotes

With over 45 years experience in the industry we understand what is required to find the best solution for your home or business, whatever the size. To ensure energy efficiency and comfort we tailor a solution for your space, and provide you with a detailed quote, explained in straightforward terms.

3

Quality Installation Backed by our 5 Year Guarantee

We are proud to offer a 5 year guarantee on the installation of your system, on top of the manufactures warranty*. We will arrange a time to install your new system that suits you and then take you through how to operate it efficiently.

4

Full Service and Maintenance

All Parr's products have a strong reputation for quality and reliability, meaning that we are able to provide full service and maintenance on all of the systems that we install. You can rest assured that in the unlikely event of a breakdown we'll be there to help. Our technicians are fully qualified and expertly trained, offering you the highest standards of workmanship and servicing.

5

Trustworthy and Reliable

We have an excellent reputation in the industry and recognise the importance of customer satisfaction. We are committed to providing honest, trustworthy and reliable support for your new system.

6

Fast, Efficient and Friendly Customer Service

We pride ourselves on our fast, efficient and friendly service. We work hard to ensure that your system is installed with as little disruption to your home or business as possible.

7

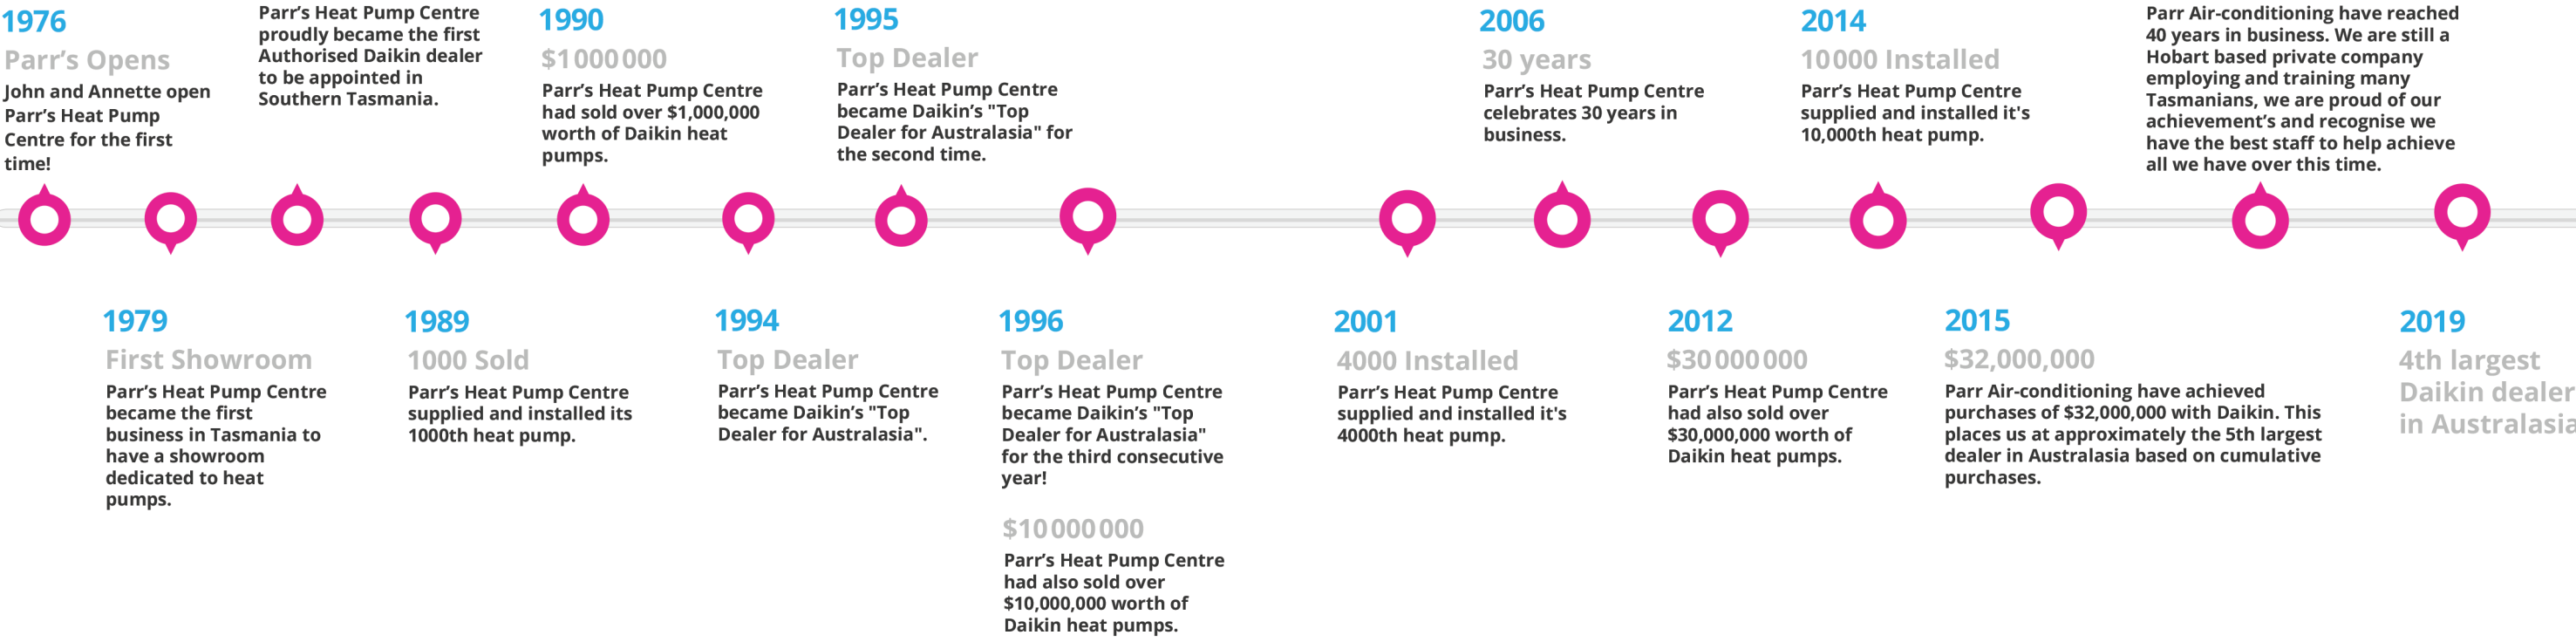

Only Quality Brands

Parr's only sell leading, well recognised brands that our customers can trust. We have access to a comprehensive product range and technical resources from our suppliers, ensuring that you get the best solution for your budget.

Making your life comfortable!

Our history

Commercial

Split Systems

Split systems are ideal for heating or cooling a single room or area of small commercial space. We have a wide range of discreet wall-mounted and compact floor standing units.

Multi-Split Systems

A multi-split air system can heat or cool multiple rooms in your business using only one outdoor unit. These systems are best for premises with limited space for ducting.

Ducted Systems

A ducted system provides climate-controlled comfort throughout your entire business. The systems are best for heating and cooling a large commercial space and are less intrusive.

Refrigeration

We offer cost effective commercial refrigeration systems for all industries. Our experience and expertise makes us leaders in the design, installation and maintenance of refrigeration systems.

Roof-Top Systems

Parr's develop roof-top packages specifically to suit commercial applications. Our experience and expertise ensures that your system will be cost effective, require little maintenance and be long lasting.

Integrated Packages

Parr's create integrated packages that can take care of all of your heating and cooling needs for your commercial site. This is can involve integration between your refrigeration and air conditioning systems giving you a more energy efficient solution.

Residential

Split Systems

Split systems are ideal for heating or cooling a single room or area of a home. We have a wide range of discreet wall-mounted and compact floor standing units.

Multi-Split Systems

A multi-split air system can heat or cool multiple rooms in your home using only one outdoor unit. Maximize your comfort, whilst saving energy, with individual room control.

Ducted Systems

A ducted system provides climate-controlled comfort throughout your entire home. These systems can be installed in a new home or tailored to suit an existing one.

Underfloor Heating

Parr's offer a wide range of highly flexible, energy efficient under floor heating options. These systems can extract heat from the outside air and distribute it evenly around the home.

Hot Water Heat Pumps

Hot water heat pumps are your environmentally friendly water heating solution. Using up to 65% less energy than conventional electric water heaters they can significantly reduce your power consumption.

Air Purifiers

Improve the quality of air indoors with an air purifier from Parr's. Our Daikin products are designed to eliminate dust, odours, bacteria, pet hair, mould, pollen, mites and other allergens, leaving your air clean and healthy.

Refrigeration

We offer cost effective commercial refrigeration systems for all industries. Our experience and expertise makes us leaders in the design, installation and maintenance of refrigeration systems. We install systems across the state for all sized businesses, no job is to big or small.

Parr's are the experts in the design, install and maintenance of high quality, cost effective refrigeration plants. As part of our engineering we will estimate operational cost for our designs, and offer alternatives, so that you can make an informed decision. The expertise and experience of Parr's engineers make our systems more energy efficient, require less maintenance and last longer then our competitors.

We have a large fleet of service vehicles and technicians who are the best qualified in their field and are able to respond quicker than other organisations.

Integrated Packages

Parr's create integrated packages that can take care of all of your heating and cooling needs for your commercial site. This can involve integration between your refrigeration and air conditioning systems giving you a more energy efficient solution.

Maintenance

Capabilities

We have been installing and maintaining mechanical plant and split system heat pumps for 45 years. We know the product, we have trained technicians utilising the best equipment and methods to ensure the equipment we supply and install operates to the maximum effectiveness over the long term.

We offer maintenance packages to suit you the client, your budget and the legal minimum requirements for building accreditation. We have a service package software program ensuring that our completed reports are sent via email to you as we complete the works also encompassing the JSA's and any SWMS are completed, ensuring legal requirements are made.

Our invoices and reports are also sent via email and can be completed on the day.

Achievements

We have achieved lots over our time as mentioned previously on our time line; some things you may not know are listed below.

- We have engineered designed and installed most of Woolworths and Coles refrigeration plants throughout the state over the last 20 years.
- We installed the First Daikin VRV system into the treasury building in Hobart that was installed in the state followed by the next VRV system into the Conservatory of music building and many more since then.
- We designed and engineered the incorporated refrigeration and air-conditioning into the largest IGA store in the state at Longford, this has resulted in the lowest operating cost for the store of that size in the state.
- These and many more achievements have been done by the dedicated staff at Parr's.
